

JANOME

Electro Press
JP Series 5

New Model JP Series 5 Higher Speed • Greater Precision • Enhanced Interfacing

Faster, more precise with multiple interface capabilities

Great for new facilities

Better for your work environment than an oil or air press

Quality control functions

Improved productivity

Installation

Operation

Maintenance

Easy Installation

- Ethernet port included as standard equipment
- Choose from 6 different Field Networks
- Low noise and clean work environment
- Much lower running cost than oil or air presses
- Easy program teaching

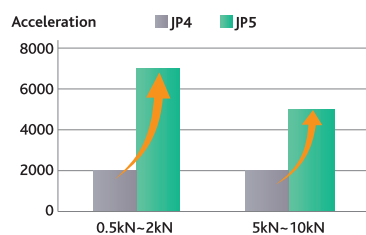

Faster ram movement for higher productivity

Max. ram speed up 2.5x; ram acceleration up 3.5x over our previous model. Best speed in the industry for lightweight presses; greatly reduces cycle time.

Ram Speed

Acceleration

A rich variety of both pressing and sensor functions

Choose from among these pressing modes and stopping parameters:

Pressing Modes	Constant Speed Pressing
	Constant Load Pressing

Stopping Parameters	Position Stop
	Distance Stop
	Load Stop
	Time Stop
	Event Stop
	Differential Stop
	Increased Load Stop
Reduced Load Stop	

Sensor functions are introduced on pp. 3 and 4.

Improved product quality

Internal processing speed up 4.0x over our previous model.

Load Display Precision: $\pm 0.8\%$ (FS)*1

*Value range from 5% or more of the maximum load.

Repeatability: $\pm 0.005\text{mm}$

*When the press unit is at a constant temperature.

Global Diagnostic Functionality

Comprehensive hardware diagnostics including PC boards. Its easy to switch among display languages; helpful in multinational workplaces where engineers and operators use different languages!

PC Software Languages

English, German, Japanese, Korean, Chinese (Simplified & Traditional)

Teaching Pendant Languages

English, Japanese, French, Spanish, Italian, German, Korean, Chinese (Simplified & Traditional), Czech, Vietnamese and Hungarian

Auto Amp Adjustment • Auto Load Calibration

Now you can perform complicated load calibrations automatically.*2

Sample Setup

*1: This is the level of precision when measured in identical working conditions.

*2: Please consult with us about compatible load cells.

Ideal for the "IoT Era" visualized workplace...

Smoothly incorporate into your facility, for easy quality control

System Configuration

Standard Controller

Field Network Compatible

CC-Link, PROFIBUS, PROFINET, DeviceNet, CANopen, EtherNet/IP

USB memory port as standard equipment

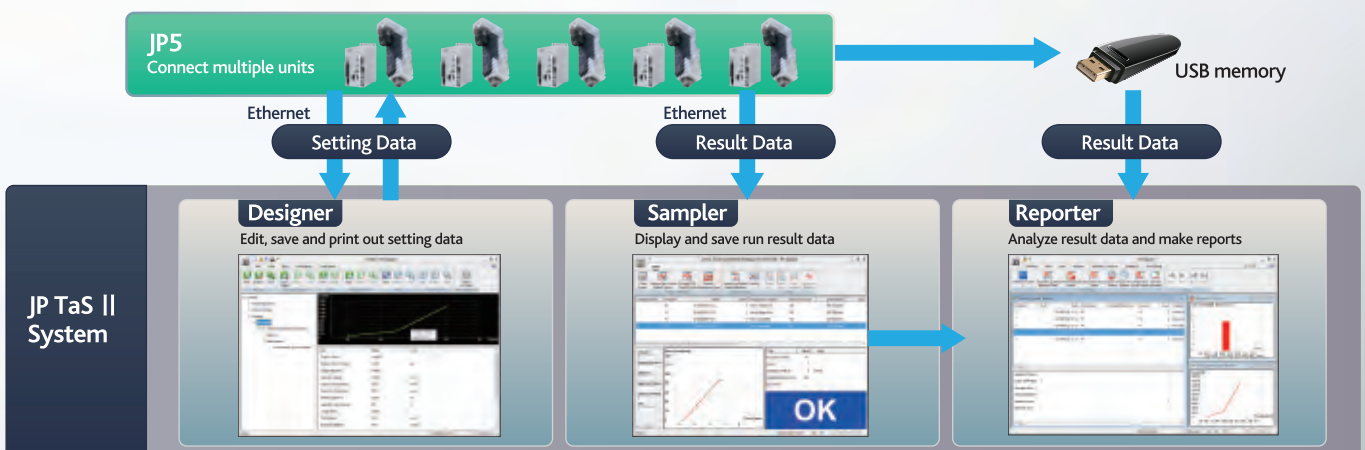

- Save result data (csv format)
- Back up and restore data
- Upgrade system software

Compact Controller

PC Software

From press fitting to testing, the Janome Servo Press

If using our servo press for metalworking, obey local laws for safety, add a safety device and obtain regulatory approval(s) for such device when required. For more information, please contact us.

Press Fitting

Sample Application 1

Sample Application 2

Pressing Condition: Constant Speed Pressing•Stop at Set Position
 Sensor Condition 1: Load Sensor•Position Range
 Sensor Condition 2: Load Sensor•Given Distance (Step End)

Swaging

Valley Load Sensor•Given Distance

has an important role in many different processes.

Sealing

Sample Application 3

Pressing Condition S1: Constant Speed Pressing•Differential Load Stop
 Pressing Condition S2: Constant Speed Pressing•Incremental Load Stop
 Sensor Function: Differential Load Sensor•Given Position

Powder Forming

Sample Application 4

Pressing Condition S1: Constant Speed Pressing•Load Stop
 Pressing Condition S2: Constant Load Pressing•Time Stop

Peak to Peak Load Sensors

Peak to Peak Load Sensor•Given Position

Peak to Peak Load Sensor•Given Distance

Inflection Point Load•Position Sensors

Differential Load Sensor•Given Position

Differential Position Sensor•Given Position

Differential Distance Sensor•Given Distance

Load Path Sensor

Path Based Load Tracking

Load Path Sensor•Given Position

Load Path Sensor•Given Distance

Freely set the sensor window to meet a variety of configuration needs.

Load Zone Sensors

Load Sensors at Position Zones

This load sensor judgment applies to all or part of the program and is not influenced by divisions between pressing steps.

Model Code

Ex.) JPU-1005L-BCNI150

JPU	-			-					C

Clean Room Model Clean Class* ⁴		ISO4 (Class 10)	ISO4 (Class 10)	ISO4 (Class 10)	-
Power Consumption	Standard Controller	3.7kW	3.7kW	5.2kW	5.2kW
	Compact Controller	3.5kW	3.5kW	5.0kW	5.0kW
Power Source		Three Phase 200~240V ±10% (50/60Hz)			

*1 Value when making a cold start. This may also change due to setting conditions.

*2 Load display precision is ±0.8% (FS) of the maximum load when pressing in the range of 5% or more of the maximum load.

This is an indicator of sensor measuring unit and accuracy and is not an indicator of load tolerance after pressing or margin of error.

Precision also dependent upon there being no influence from increases in temperature.

*3 Position repeatability is dependent upon the press bearing a constant load at constant press unit and surrounding environmental temperatures.

Repeatability is not a guarantee of absolute position precision.

*4 The clean class indicated above is based upon ISO-14644-1 and upon United States Federal Standard 209D (FED-STD-209D).

The Compact Controller is Standard Type only; it is usable with a Clean Room Model press, provided the Compact Controller is installed outside of the clean room.

Common Specifications

Basic Pressing Modes		While pressing at a constant speed: Position Stop / Distance Stop / Load Stop / Incremental Load Stop / Differential Load Stop / Event Stop / Reduced Load Stop While pressing at a constant load: Time Stop / Position Stop / Distance Stop / Event Stop Use these combinations to create multistep pressing settings in a single program.
Sensor Functions		Step Sensor / Program Sensor / Load Zone Sensor
No. of Programs*1		Up to 512
No. of Pressing Steps*1		Up to 512 (in one program)
No. of Step Sensors*1		Up to 16 (in one step) Up to 512 (in one program)
External Input/ Output	COM	RS-232C 1ch
	I/O-SYS*2	17 Inputs / 16 Outputs *Specify NPN/ PNP at time of order.
	Ethernet	10BASE-T/100BASE-TX
	MEMORY	For USB Memory Connection (Save results data, backup and restore data, update system software.) (up to 32GB)
	Field Networks	CC-Link, PROFIBUS, PROFINET, DeviceNet, CANopen, EtherNet/IP (all are optional)
	I/O-S	For Safety Device Connection
Encoder*3	Other	Teaching Pendant Connector, SWBOX Connector (standard) Load Cell Output, Encoder Output, Analog Monitor Output (optional)
		Incremental (standard) or Absolute (optional)
Display Units		Load unit: N, kgf, Lb Length unit: mm, inch
Display Languages	PC Software	English, Chinese (Simplified & Traditional), Japanese, Korean & German
	Teaching Pendant	English, Japanese, Korean, Chinese (Simplified & Traditional), Vietnamese, German, French, Spanish, Italian, Romanian, Czech & Hungarian
Drive and Control Method		AC servomotor drive 32 bit CPU (dual core)
Work Environment	Surrounding Temperature	0~40°C
	Relative Humidity	20~90% (Without condensation)

*1 The number of programs, pressing steps and step judgments is limited in relation to the total memory size.

When multiple steps are included in one program, this in turn limits the number of new programs which can be added to the memory.

*2 Optional internal I/O Power Supply available for the Standard Controller.

*3 Please contact us for operating specifications and compatible models.

<Accessories>

- PC Software JP5 Designer (Windows® 7, Windows® 8.1, Windows® 10, Windows® Embedded Standard 7 WS7P compatible)
- Operation Manual (CD-ROM)
- Press Unit Connector Cables (3m) (Optional Lengths: 5m, 10m, 15m, 20m)
- SWBOX Short Connector
- TPU Short Connector
- I/O-S Short Connector
- I/O-SYS Connector

<Optional>

- Teaching Pendant (with Emergency Stop Switch/Sub-Switch) (Cable Lengths: 3m, 5m)
- Touch Panel Interface (Windows® 10 IoT Enterprise)
- Maintenance Box (Cable Lengths: 3m, 5m)
- PC Software JP TaS II System (Windows® 7, Windows® 8.1, Windows® 10, Windows® Embedded Standard 7 WS7P compatible)
- I/O-SYS Cable (2m, 3m, 5m)

Touch Panel Interface

Janome Servo Presses are used in a wide range of industries, including automotive, consumer electronics, aerospace, cosmetics and pharmaceuticals.
